-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. Claims 1-22 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-22 of copending Application No. 10/612279. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

2. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 8, line 1, "can include" is indefinite because it is not clear whether the structure that follows that phrase is positively claimed.

3. Claims 23-28 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on June 17, 2004.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 3-10, 15, and 17-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Versaw (PGPub 2002/0096859).

Art Unit: 3611

Versaw shows a motorcycle with a front wheel, rear wheel, rear fender 26 and component 10, where the fender and component are directly connected to the frame 28.

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 8, 11-14, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Versaw in view of Saiki.

Versaw lacks a bracket for mounting saddlebags and a footrest mounted to the rear upper frame of the motorcycle.

Sakai shows a motorcycle with a pair of brackets 35 mounted to the rear upper frame 17. The bracket supports saddlebags 29 and footrests 41. Versaw shows bolt connectors (unnumbered) that appear to be received in threaded opening in the frame 17 (see Figure 3, at element 36).

It would have been obvious to one of ordinary skill in the art to provide the Versaw motorcycle with saddlebag and footrest support brackets, as taught by Saiki, in order to securely attach saddlebags. Regarding claim 11, the brackets lack bosses. However, it is old and well known and would have been obvious to provide bosses at connection points, in order to reinforce the connection.

Art Unit: 3611

8. Claims 2 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anne Marie M Boehler whose telephone number is 703-308-0422. The examiner can normally be reached on 7:30-5:00, Monday-Thursday, and alternate Fridays.
